
**AR 6022 Requirements for the Control of Fats, Oils, and Grease
from Food Service Establishments**

Approved: June 4, 2009
Revised: January 16, 2019

In accordance with BP 6010, the District controls the amount of fats, oils and grease entering the sewer system from food service establishments to comply with applicable state and federal wastewater discharge requirements and regulations.

A copy of the “Requirements for the Control of Fats, Oils, and Grease from Food Service Establishments” is available upon request from the Environmental Division.
