

NOTES:

1. Bathymetric data is from a survey conducted by Geo Survey, Inc. on 8-9 July 1988 and represents the hydrographic survey data contained on Data 1.

2. The hydrographic survey was conducted using a hydrographic survey instrument and conducted under U.S. Coast and Geodetic Survey Order 1000, October 1980. The survey was performed using a hydrographic instrument, and an INSISTANCE Model 448 hydrographic instrument is shown on the California State Plane Coordinate System, zone 2 (NAD 1983).

3. Water depths are in feet below the datum (mean low water elevation) of the flow of the survey area of measurement. Contours are provided at 5 foot depth intervals.

The absolute feature shown on this chart are from a digital topographic map provided by the Carbon Engineers. Contours are provided at 5 foot depth intervals.
